

**GREEN INFRASTRUCTURE
REQUEST FOR QUALIFICATIONS**

ADDENDUM #1

June 5, 2020

- A. As a clarification, this RFQ is seeking to identify individual firms to be pre-qualified to work on green infrastructure projects with Buffalo Sewer. The Worksheet and Professional Team description should only include the staff of the firm that is submitting qualifications, and not for any potential subconsultants. After Buffalo Sewer identifies pre-qualified firms, Requests for Proposals (RFPs) for projects will be solicited from pre-qualified firms at the discretion of Buffalo Sewer. During the RFP solicitation process, firms will be able to propose teams, if appropriate for the project. The narrative description of the Approach can include mention of the firms' ability to serve as project manager for certain tasks if this is the approach of the firm, but should be clear about which services and tasks the firm is able to perform independently. The description of Experience should identify any past collaborations and subcontracted services in reference projects, if appropriate.
- B. Addenda and responses to questions will be posted at the following webpage:
